

Anchor Socket Bolts

Dual Thread M8 / M10 Socket Bolt Is A Self Tapping Anchor For The Use Of M8 And M10 Threaded Rod With The Need For Only One Socket
The Undercutting Action Provides A Positive Anchorage With No Expansion Force

M8 /M10 Dual Internal Thread Socket Anchorbolt										
Part Number	Drill Hole Diameter mm	Hole Depth mm	Overall Length mm	Emdebmnt Depth Mm	Dual Internal Thread Lgths		Across Flats mm	Design Tensile Resistance Kn	Rec. Tensile Ressistance Kn	Tightening Torque Nm
					M8 Internal Thread Length mm	M10 Internal Thread Length mm				
JAB06/08SOCKET	6	50	75	40	10	15	17	3.3	2.3	25

The Ankerbolt Socket Bolt Is A Self Tapping Anchor For Use In A Variety Of Base Materials. The Choice Of M8 / M10 Thread Gives Options For The Diameter Of Threaded Rod Being Used.
The Undercutting Action Provides A Positive Anchorage With No Expansion Force

M8/M10 Single Thread Socket Anchor									
Part Number	Drill Hole Diameter mm	Hole Depth mm	Overall Length mm	Emdebmnt Depth Mm	Internal Thread x Length	Across Flats mm	Design Tensile Ress. Kn	Recommended Tensile Resistance Kn	Tightening Torque Nm
JAB06/08SOCM08	6	50	55	40	M8 x 10 L/g	13	3.3	2.3	25
JAB06/08SOCM10	6	50	55	40	M10 x 10 L/g	13	3.3	2.3	25

Suitable For Use On Base Material
Concrete C20/25 To C50/60
Hollow Concrete Planks
Solid Brickwork
Concrete Block
Natural Stone
